**\*\*\*Alex Deng\*\*\***

Hello, Alex Deng here. I am quite good at computer and internets. If elected, I will properly maintain the IT facilities of Osler, both hardware and software. Broken things will get fixed or replaced. In addition, I would be able to contribute much more to Osler due to my committee experience in the International Relations Society last year, where I was publicity and media secretary. This involved the creation of IRSoc's web presence ([irsoc.wordpress.com](http://irsoc.wordpress.com)), and the hedonistic thrills of updating it in a timely manner. I had to build and manage a large mailing list and fired off regular society bulletins. I was heavily involved in all aspects of our printed materials from formatting termcards and posters to physically posting leaflets into hundreds of pigeon holes. In addition I have experience in graphic design and I created the logos for both IRSoc and The Ultrasounds.
